

About Us

SIRENS ENGINEERING

At Sirens Engineering, we are a premier engineering, innovation and solutions provider dedicated to delivering world-class and supreme services across the upstream and downstream oil & gas industry — both onshore and offshore.

Headquartered in Bangkok, Thailand, we bring together a team of highly experienced engineers, project delivery experts and technical specialists with decades of hands-on experience in the energy sector to serve clients worldwide.

What sets us apart is our unwavering commitment to excellence throughout the entire project lifecycle – from initial concept and detailed engineering & design to construction, installation, commissioning and final handover – with precision, full-support and accountability ensuring our clients achieve safe, on-time and cost-effective project completions; no matter how complex the challenge. We understand that every component, every weld and every decision carries significant consequences across safety, schedule and stakeholder expectations.

Offshore Structural Engineering & Design
